Wed, 05/04/2011

Dry and clear. No aircraft ops today. Ground ops run as normal. Next really good chance for precip missions seems to be into the Tuesday time frame of next week with only slight chances up to that point according to forecast.

We are working a land surface mission for Friday along a NW-SE transect across SGP CF (300 km line). This transect would parallel the 25 April NW-SE racetrack but be shifted to be over SGP.

Current thought is 1800 UTC takeoff of ER-2 on Friday 5/6 for a 4 hour flight. Only concern is potential winds at Offutt.

Today Dan will head to Norman for a visit. Walt will visit NPOL and possibly CF.

Walt Petersen and Dan Cecil
